

Extreme Coatings and Precision Spray and Coatings Merging Houston Operations

For Immediate release – 11-12-21

Extreme Coatings (St. Petersburg, FL) and Precision Spray and Coatings (Houston, TX) have formed a joint venture to merge their Houston operations. The combined entity will create one of the largest industrial coating offerings in North America and give both companies the ability to promote a combined offering that includes:

- 130,000 combined sq ft. of operations
- 10 chrome plating tanks
- 9 HVOF spray operations
- ID/OD plating
- ID/OD thermal spray
- Shot peen
- 10 thermal spray powder formulations manufactured and produced in the USA by Extreme's parent company, Surface Engineering Alloy Company, Inc.
- Twin arc
- Spray and fuse

The merger gives Precision Spray and Coatings additional spray capacity, access to Extreme's ID spray technology, and a reliable source of thermal spray powders produced at Extreme's facility in Florida. For Extreme, the merger gives Extreme access to Precision's chrome plating technology to complete its offering to the agricultural and plastics markets, as well as additional spray capacity at its Houston operations location.

"This merger instantly gives both our companies an additional range of services that will benefit each of our customers. We're most excited about leveraging Extreme's foundry in Florida giving us a reliable, domestic supply of thermal spray powders as we continue to navigate a challenging supply chain environment."

- John Jenkins, President, Precision Spray and Coatings

"I couldn't be more vitalized by the synergies of this deal. This joining of forces loads both Companies with an arsenal of technology, and much needed capacity that supports our mission to be recognized as the leading Engineered Surfaces provider across the globe."

- Curt Kadau, President, Extreme Coatings

About PSC: Precision Spray and Coatings is an industrial coatings provider in Houston, TX that services the oil and gas, industrial hydraulics, and aviation markets. It offers an array of services including hard chrome plating, HVOF thermal spray, and shot peen.

About Extreme: Founded in 1996, Extreme Coatings is a world leader providing wear and corrosion resistant coating solutions used for surface engineering in a variety of industries worldwide. With In-depth knowledge of material science, tribology, and metallizing application processes; HVOF, Wire, Plasma, and Flame Spray, Extreme has a strong capability to solve problems. Headquartered in St. Petersburg, Florida; they provide solutions to customers all over the globe with operations in Houston, Texas; Mumbai, India; Seoul, Korea; Santiago, Chile; and Gmunden, Austria.
